

2017-2018

Elementary Council

Welcome to the Elementary Council Webpage!

If you are a member of NAEOP and work in an elementary school, you are automatically a member of this council. I encourage you to take advantage of the networking opportunities that are available to you. You will find that networking with your peers across the nation is enlightening and rewarding. Take a moment to share your ideas and glean knowledge from your colleagues. There are unlimited prospects and visions for every one of us to discover.

If you are not a member of NAEOP, please consider becoming one. NAEOP is the only national association dedicated exclusively to the educational office professional. The success of any educational organization is due to the solid support provided by its skilled office staff. NAEOP provides professional development opportunities through seminars, webinars, briefings, and institutes, as well as scholarship opportunities for members and member dependents.

Another good reason to join NAEOP is the Professional Standards Program. It is designed to recognize your professional growth through a specifically-designed certification program. This rewarding distinction may lead to opportunities to further your career.

Being an office professional requires more than basic knowledge of your organization's policies and procedures. There are nuances and subtleties in every workplace. If you have found ideas or advice that have assisted you in becoming a better office professional, why not share this knowledge with other office professionals as a member of NAEOP's elementary council. We are all in this together.

This year, NAEOP President Lisa Morehouse, CEOE, has chosen as her theme *Accept the Challenge, Become the Difference*. We have all *accepted the challenge* in our chosen career by taking a position as an office professional. Now, I urge you to *become the difference*.

Please let me know if you have questions about the NAEOP member benefits or your membership in the elementary council. I am here to assist you in any way possible.

Debra Nordquist  
Elementary Council Chairman
